Kampala, Uganda.

13th/September/2021

**The Executive Director**

Petroleum Authority of Uganda (PAU)

PO Box 833

Entebbe

Application for the position of Software Engineer/ICT Security Officer.

I hereby submit my application for the above-mentioned position which was advertised online and in the print media of 13th September 2021.

I am a Ugandan, male software engineer holding a Bachelor's degree in Software Engineering from Makerere University and currently pursuing a Master's degree in Computer Science at the same school with a focus on Data Science

I possess over 3 years of experience in the software engineering field. Where I have been involved in the general life cycle of software development from the planning, analysis, design, implementation, testing and integration, deployment and finally the maintenance of software.

I am currently a graduate student at the great institution of Makerere University as I juggle such responsibilities with my freelancing work including; being an assistant to an American colleague working as a software engineer in Silicon Valley under a company called Molecular, I offer IT services under a startup called Kibsys to an NGO called ICHAD, an affiliate to Washington University, I also offer software engineering consultancy to MM-ICT on non-contractual bases.

Earlier, I worked as a Software Engineer at Cabral technologies from 2018 to 2020 where I was involved in a multitude of activities including but not limited to the planning of in house software ideas and designs, requirements elicitation, design, development and deployment of software products as a full-stack developer using tools like PHP Laravel, Flask, GIT, Postman among others. And before that, I worked as a student software developer at WIMEA-ICT, an affiliate organisation to Makerere University where I had the opportunity to work on amazing projects involving object detection and recognition using different Machine Learning tools including but not limited to OpenCV.

I am a very resourceful person always looking for ideas to automate hard to do tasks in an office environment, I am self-driven, passionate, goal-oriented and a team player. I strongly believe that with the multiple skills I carry, I will be an asset to this organisation, PAU hence being the best candidate to be considered for this responsibility.

Sincerely,

**SUUNA CONRAD (0704203849)**

Bsc.SE (Hons), Software Engineer
